

Notes:

1. Typically, the 15 km/h curve will be used.
2. see examples in Section 44-1.04 for use of figure.
3. Figure based on a truck with initial speed of 90 km/h. However, it may be used for any design speed.
4. This figure represents approximately 97.5% of all tractor-trailer and single-unit trucks.

CRITICAL LENGTH OF GRADE (Other Routes)
